

Focus Workshop

Polymer Clay Canes

Learn the art of making a basic polymer clay cane ... rods or tubes of shapes that create a design when sliced into a cross section. Canes will be used to make a simple pendant or earrings.

Schedule your workshop today!
Individual or group workshops available.

\$25 includes materials for first project.

Instructor – Jo Ann Reeves

Four years ago, Jo Ann wandered into our Bead Store with no jewelry making experience whatsoever. She took her first beading class (spiral rope) and promptly jumped in with both feet. Since then, she has explored and mastered more jewelry mediums than most of us have in our lifetimes. Jo Ann loves beads, but she truly loves the design concept, process, and the tactile experience of creating art jewelry. She is one of our in-house instructors and has jewelry in several galleries in Anderson County.
